

Pattern Pathfinder

Notice what fits.

Make it yours.

You may be able to assemble scattered clues while keeping more than one explanation alive.

A conditional fit: some counterexamples are present or have not been reviewed. You can choose another supported signature or revise your answers.

The capabilities in your combination

Signal detection

early noticing · fine-grained observation

Often true · self-reported

Pattern integration

systems thinking · cross-source synthesis

Often true · self-reported

Uncertainty updating

hypothesis testing · calibrated uncertainty

Sometimes true · self-reported

YOUR SIGNATURE MOVE

Make one prediction before the outcome and count misses beside hits.

This name and its combined possibilities are editorial hypotheses. Research context and the observation ledger appear in the Scientific Report. No scan, diagnosis or personal neural alteration was inferred.

GET MORE FROM WHAT YOU NOTICE

Conditions that help you use it.

Access to disconfirming evidence and an explicit decision point.

POSSIBLE KRYPTONITE

What to watch for

Pattern seeking can become overfitting when evidence is thin or emotionally charged.

A proposed trade-off to check, not a difficulty automatically assigned to you.

WHAT YOU ACTUALLY REPORTED

Friction, in your terms

Too much input · Switching cost

Counterexamples can qualify or remove a candidate signature; they never lower your worth or become hidden diagnoses.

Your support kit

Trusted support · Restorative routine · A workable environment

These are reported supports, not calculated amplifiers or buffering percentages.

ONE REAL-WORLD QUEST

Try the move. Keep the counterexamples.

Make one prediction before the outcome and count misses beside hits.

Choose a small, low-stakes situation. Notice what helped, what it cost, and when the description did not fit. Change the story when the evidence changes.

Strengths, difficulty, practice and support can coexist. This report does not claim that harm was necessary or that you owe a positive interpretation of it.
